Please amend the Claims as follows:

Claims 1-37 (Cancelled)

38. (Currently Amended) A purified and isolated hyperimmune serum-reactive S. pneumoniae antigen that is immunologically reactive with sera from a human having an S. pneumoniae

infection or an uninfected healthy human, the antiqen comprising an isolated S. pneumoniae

polypeptide or peptide fragment thereof that is:

a polypeptide identified by SEQ ID NO. 243;

b) — an antigenic a peptide fragment comprising an antigenic fragment containing an epitope immunologically-reactive with sera from an S. pneumoniae-infected human

having an amino acid sequence consisting of defined by amino acids 1-285 of the amino

acid sequence identified by SEQ ID NO: 243; or

c) an antigenie a peptide fragment comprising an antigenic fragment containing an epitope immunologically-reactive with sera from an S. pneumoniae-infected human

having an amino acid sequence consisting of defined-amino acids 15-37, 32-57, 101-

<del>151, 101-121, 115-135, 138-158, 152-172, 220-242 or 236-258 of SEQ ID NO. 243, 152-172, 101-121, 115-135, 138-158, 152-172, 101-121, 115-135, 138-158, 152-172, 120-242 or 236-258 of SEQ ID NO. 243, 152-172, 101-121, 115-135, 138-158, 152-172, 120-242 or 126-128, 152-172, 120-128, 152-172, 152-172, 152-172, 120-128, 152-172, 152-1</del>

wherein each of said polypeptides or antigenic peptide fragments comprises an epitope capable of eliciting an immunological reaction in a human.

39. (Cancelled)

40. (Cancelled)

41. (Currently Amended) An S. pneumoniae antigen according to claim 38, wherein the antigen

is an isolated antigenic a peptide fragment comprising an antigenic fragment containing an

epitope immunologically-reactive with sera from an S. pneumoniae-infected human having an amino acid sequence consisting of defined by amino acids 1-285 of SEQ ID NO. 243.

42. (Cancelled)

43. (Currently Amended) An S. pneumoniae antigen according to claim 38 that is a peptide

fragment comprising an antigenic fragment containing an epitope immunologically-reactive with

3

sera from an S. pneumoniae-infected human having an amino acid sequence consisting of

<del>defined by</del> amino acids 15-37, 32-57, <del>101-151, 101-121,</del> 115-135, 138-158, 152-172, 220-242

or 236-258 of SEQ ID NO. 243.

44. (Currently Amended) A pharmaceutical composition comprising at least one antigen

according to any of claims 38, 40, 41, or 43, and optionally a pharmaceutically-acceptable

carrier or excipient.

45. (Original) A pharmaceutical composition according to claim 44, further comprising an

immunostimulatory substance.

46. (Original) A pharmaceutical composition according to claim 45, wherein the

immunostimulatory substance is a polycationic polymer, an immunostimulatory deoxynucleotide

(ODN), a peptide containing at least two Lys-Leu-Lys motifs, a neuroactive compound, alum, or

a Freund's complete or incomplete adjuvant.

47. (Cancelled)

48. (Original) A pharmaceutical composition according to claim 44 that is a vaccine.

Claims 49 through 68. (Cancelled)
